

Title: UB Job Hiring System

Description of the system:

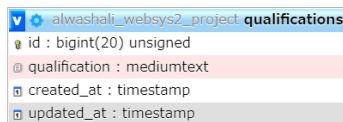

The system can be used to create new job postings for the public to speed up the hiring process and make the process seamlessly easier on both sides, it includes most of the stages during job hiring such as: interviewing, requesting an interview and so forth.

Database:

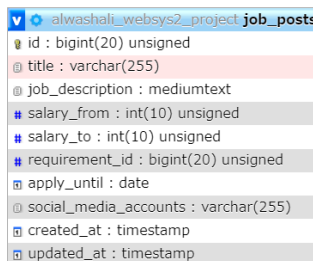

The screenshot shows the MySQL Workbench interface with the 'Structure' tab selected. The database 'alwashali_websys2_project' is open. A list of 8 tables is displayed, each with icons for Browse, Structure, Search, Insert, Empty, and Drop. The tables are: failed_jobs, job_posts, migrations, password_resets, personal_access_tokens, qualifications, requirements, and users. A summary row at the bottom indicates 8 tables, a total of 58 rows, and a total size of 224.0 KiB.
